E/CONF.39/D/103
SUMMARY
19 Oct. 1962
ORIGINAL: ENGLISH

UNITED NATIONS CONFERENCE
ON THE APPLICATION OF SCIENCE AND TECHNOLOGY
FOR THE BENEFIT OF THE LESS DEVELOPED AREAS

SUMMARY

Agenda Item: D.8.1

Canada

ORE MICROSCOPY AS A GUIDE TO ORE DRESSING PROCEDURE

By M.H. HAYCOCK,
Head, Mineralogy Section,
Mineral Sciences Division,
Mines Branch,
Department of Mines
and Technical Surveys,
Ottawa, Canada

Papers have been contributed to the United Nations Conference on the Application of Science and Technology for the Benefit of the Less Developed Areas as working papers for that Conference. They are published as presented by the contributors, and the contents and the views expressed are those of the contributors. (See notes overleaf.)

NOTES

1. Papers selected for inclusion in General Sessions will be available at the Conference in the following official languages of the United Nations: English, French, Russian and Spanish.

2. Papers selected for inclusion in Specialized Sessions will be available at the Conference in only one of the above official languages.

3. Summaries of all papers, as submitted by contributors, will be available at the Conference in the following official languages of the United Nations: English, French, Russian and Spanish.

4. Papers and summaries will not be available for general distribution in advance of the Conference. They will be published in advance in limited quantities only for the use of delegations of participating governments and of other authorized participants. Post-Conference publication and general distribution of the Conference Proceedings will follow United Nations practices as laid down by the United Nations Publications Board.

ORE MICROSCOPY AS A GUIDE TO ORE DRESSING PROCEDURE

by

M.H. Haycock, Head, Mineralogy Section

Mineral Sciences Division, Mines Branch,
Department of Mines and Technical Surveys, Ottawa, Canada.

1. A brief outline is presented of the use of ore microscopy as a guide to ore dressing procedure. Practical advice is given as to the apparatus and the technique of preparing and examining polished sections of ores. Photomicrographs illustrate some of the features of metallic ores. The works listed in the bibliography cover the field, and contain numerous references to the detailed literature.
